

## 1. ZeeZee bank

**ZeeZee** is a leading private sector bank. In the last Annual meeting, they decided to give their customer a 24/7 banking facility. As an initiative, the bank outlined to develop a stand-alone device that would offer deposit and withdrawal of money to the customers anytime.

You being their software consultant have been approached to develop software to implement the functionality of deposit and withdrawal anytime.

### Component Specification: Account

Type(Class)	Attributes	Methods	Responsibilities
<b>Account</b>	long accountNumber  double balanceAmount	Include the getters and setters method for all the attributes.  Include a parametrized constructor of two arguments in the order – accountNumber,balanceAmount to intialize the values for the account object	

### Requirement 1: Being able to deposit money into an account anytime

As per this requirement, the customer should be able to deposit money into his account at any time and the deposited amount should reflect in his account balance.

### Component Specification: Account

Component Name	Type(Class)	Methods	Responsibilities
Deposit amount to an account	Account	public void deposit(double depositAmt)	This method takes the amount to be deposited as an argument  This method should perform the deposit,by adding the deposited amount to the balanceAmount

## Requirement 2: Being able to withdraw money from the account anytime

As per this requirement, the customer should be able to withdraw money from his account anytime he wants. The amount to be withdrawn should be less than or equal to the balance in the account. After the withdrawal, the account should reflect the balance amount

### Component Specification: Account

Component Name	Type(Class)	Methods	Responsibilities
Withdraw amount from an account	Account	public boolean withdraw(double withdrawAmt)	<p>This method should take the amount to be withdrawn as an argument.</p> <p>This method should check the balanceAmount and deduct the withdraw amount from the balanceAmount and return true. If there is insufficient balance then return false.</p>

In the **Main** class, Get the details as shown in the sample input.

Create an object for the Account class and invoke the deposit method to deposit the amount and withdraw method to withdraw the amount from the account.

All classes and methods should be public, Attributes should be private.

#### Note:

Balance amount should be displayed corrected to 2 decimal places.

Order of the transactions to be performed (Display,Deposit,Withdraw).

If the balance amount is insufficient then display the message as shown in the Sample Input / Output.

In the Sample Input / Output provided, the highlighted text in bold corresponds to the input given by the user and the rest of the text represents the output.

Ensure to follow the object-oriented specifications provided in the question.

Ensure to provide the names for classes, attributes, and methods as specified in the question.

Adhere to the code template, if provided.

**Sample Input/Output 1:**

Enter the account number:

**1234567890**

Enter the available amount in the account:

**15000**

Enter the amount to be deposited:

**1500**

Available balance is:16500.00

Enter the amount to be withdrawn:

**500**

Available balance is:16000.00

**Sample Input/Output 2:**

Enter the account number:

**1234567890**

Enter the available amount in the account:

**15000**

Enter the amount to be deposited:

**1500**

Available balance is:16500.00

Enter the amount to be withdrawn:

**18500**

Insufficient balance

Available balance is:16500.00
