

Subject : Request to grant HackerRank Access to Mock Tests for Student to Practice.

On behalf of team, I would like to request your approval to allow our students to practice on the HackerRank platform, providing them access to the website will enable them to practice, familiarize themselves and be prepared for upcoming assessments.

I Wanted to share some feedback regarding recent Java Backend tests on the platform.

We encountered the following issues during the assessments:

1. **ApplicationContext** build erros due to network load and unresponsive IDE.
2. **IllegalArgument** exceptions occuring unexpectedly.
3. **ResponseEntity** behaviour in certain cases is unclear, making it harder to identify what should be the format of response and status codes.
4. The **IDE** Sometimes faces build issues, causing test case failures due to lags rather than actual code errors.

These issues can impact performance and assessment accuracy. We believe that regular mock tests could help in identifying such problems early, as well as giving participants more practice in the environment.
